

RESOURCES FOR WATER CONSERVATION

Residents are encouraged to reduce their water consumption by 10% to 15% in response to the current drought conditions. The following are sources of information on programs or landscaping that support water conservation.

- The City of Rolling Hills has available to residents and landscape designers a list of native plants that are acceptable in the community. The Rolling Hills Native Plant Guidelines identifies landscaping that is water tolerant and complies with Fire Department requirements.
- The West Basin Municipal Water District has a variety of water conservation programs, as listed below, for residents. Information on these programs and about water conservation can be found at: <http://www.westbasin.org/Conservation/ResidentialPrograms/tabid/222/Default.aspx> or by calling 1.310.217.2411.
 - High-Efficiency Toilet (HET) Distribution Program
 - Green Garden Program
 - Ocean Friendly Program
 - California Friendly Program
- California Water Service provides water to residents of Rolling Hills. The utility company provides various incentives to its customers in support of water conservation. Information on the programs below can be obtained at <http://www.calwater.com/conservation/rebates.php>. Rolling Hills is located within the Rancho Dominguez District of California Water Service.
 - High-efficiency clothes washer rebate
 - High-efficiency toilet rebate
 - Rotating Sprinkler Nozzles
 - Weather-Based Irrigation Controllers
 - Synthetic Turf
